

M3SECURITYSYSTEMS

CLIENT: Paragon Data & Electrical *on behalf of*
Irwin Mitchell Solicitors

ISSUES: Expansion of company into two new
offices in Cambridge & Southampton

SOLUTION: Design, supply & installation of Intruder Alarm,
Access Control, CCTV, Fire Alarm & GSM
Intercom systems

M3 Security consulted extensively with Irwin Mitchell to understand the systems in their existing offices, and their requirements for the new offices. This included full integration between each of the systems to allow for remote activation & deactivation of alarms and remote locking & unlocking of doors.

The complete solution offered was:

CCTV

- IC Realtime 1080P HD network IP network video recorders (NVR's)
- High Definition day/night colour/mono IP cameras to provide highly detailed images of the key areas of the premises to ensure the safety of all employees & visitors

Access Control

- BSB Progeny IP controllers networked locally & remotely via clients LAN & VPN
- HID proximity readers to provide authorised access to entrances & secured doors within premises

Intruder Alarm

- Texecom Premier Elite control panels with IP connections to clients LAN
- Comprehensive movement detection throughout all areas of the premises with confirmed alarm facility
- Connection to smartphone App for offsite control

GSM Intercoms

- Videx GSM intercoms to provide visitors & temporary staff controlled access
- Calls routed to on-site reception, maintenance or off-site staff for local or remote door release

Fire Alarm

- Alterations to existing buildings fire alarm systems to ensure compliance

Each of the above were fully integrated to allow remote monitoring & viewing from clients remotely manned security centre. This allowed central system administration, including issuing of access cards, access log interrogation, system alterations, intercom number amendments etc.
